Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1914 Excerpt: .by the shortest route and New York only about 98 miles. The transmission line has been designed for long distance work, the circuits being run in duplicate to insure uninterrupted service, and a working pressure of n0,000 volts, is being employed or has been provided for, except on those circuits supplying electricity in the immediate vicinity of the station. The station is in the shape of a T, the base of which abuts a foothill, and is connected to a railroad track thereon by an elevated steel structure supporting standard-gage tracks. The head of the T contains the generating, switching and transforming equipment, while the stem houses the boilers, which are arranged in a single row beneath the tracks and overhead bunkers. The station exterior is of pleasing design, and an unusual amount of window area has been provided to furnish good light and ventilation. An...
